MOORING USAGE GUIDE

- ✓ Pick up pole, Bow Hawser to Bow Cleat.
- ✓ (Hawser is located approximately 6' below the surface of the water.)
- ✓ Run Spreader Line to stern of boat. (Spreader Line is attached to Bow Hawser.)
- ✓ Take all slack out of Spreader Line and attach Stern Hawser to Stern Cleat.
- ✓ Re-check Bow and Stern Cleats to make sure you are moored securely. Drop slack Spreader Line into water.

The tide will affect your mooring. Lines will need to be adjusted periodically to take up slack or to be let out. Upon leaving the mooring, untie stern, then bow lines and drop into water. Allow enough time for the lines and spreader to sink free and clear of the propeller of your vessel to prevent fouling.
